DISHANT CHANCHAD
AI/ML Specialist | Web & Mobile Developer | Full-Stack Engineer
Phone No. : +91 8238384984
Email : dishantch7@gmail.com

PROFESSIONAL SUMMARY:

- Experienced React-Native, JavaScript, React-JS, and UI/UX Developer with over 8 years of expertise in designing, developing, and optimizing web and mobile applications. Proficient in AI/ML integration, Redux architecture, cloud computing (AWS), and version control systems (Git, GitLab, Bitbucket). Adept at improving performance, ensuring cross-browser compatibility, and implementing modern UI/UX principles. A self-motivated team player with strong analytical, communication, and problem-solving skills.

TECHNICAL SKILLS

Languages & Frontend: JavaScript, TypeScript, React-Native, React Js, Next Js, HTML5, CSS3, Bootstrap, ES6
Build Tools: Visual Studio Code, JIRA, GitHub, GitLab, Trello, Xcode, Android Studio, BitBucket, Agile/Scrum
OS & Environment: Windows, Linux, MAC
Backend: Node.js,Express.js,Firebase, PostgreSQL, MongoDB, GraphQL Cloud & DevOps,AWS (EC2, S3, Lambda, DynamoDB), Firebase, Docker, CI/CD Pipelines
UI/UX & Design: Responsive Design, Material UI, Tailwind CSS, Figma, Adobe XD, Framer Motion
AI/ML Integration: TensorFlow.js, OpenAI APIs, ML Kit, Firebase ML, Chatbots, AI-based Personalization

EDUCATION

Degree: Bachelor of Technology Computer Engineering
University : Uka Tarsadia University, Surat
Academic Year: 2013-2017

PROFESSIONAL EXPERIENCE

Project: Wasalt
Role: React-Native Developer And React Js

Responsibilities:

- Collaborated with cross-functional teams to understand project requirements and prepared comprehensive test cases.
- Interacted with developers for requirement clarifications, ensuring a clear understanding of project objectives.

- Executed test cases in accordance with system requirements, contributing to the overall quality of the software.
- Developed mobile applications using React Native, Bootstrap, and CSS, integrating Restful APIs for seamless functionality on Android and iOS.
- Utilized React JS for efficient templating, enabling faster compilation and the creation of reusable components.
- Played a key role in UI development using TypeScript, JavaScript, and JSON, with a focus on Reactive forms.
- Successfully resolved client-side issues, enhancing the overall user experience.
- Utilized JIRA for project tracking and actively participated in the SCRUM process, contributing to the timely completion of tasks in sprints.

Environment: HTML, CSS, Java Script, Bootstrap, REST Client, JIRA, Git.

Project: TerraGo StreetlightOps
Role: React Js and React-Native Developer

Responsibilities:

- Designed professional and user-friendly front-end applications for web and mobile platforms using React Js, HTML, CSS, JavaScript, TypeScript, and React-Native.
- Implemented key functionalities such as searching, filtering, sorting, and validation using React JS and JavaScript.
- Actively participated in Daily Scrum meetings, reviews, and demos with management, ensuring effective communication and collaboration within the team.
- Developed and executed comprehensive test scenarios, lint, test cases, and test scripts for both web and mobile applications using Test Complete (JavaScript).
- Integrated Gradle build with Docker for streamlined deployment, enabling direct browser launches and seamless communication with client sites.
- Utilized AWS environment to set up and manage databases on the cloud, ensuring robust and scalable solutions.
- Effectively utilized JIRA for effort tracking and Git for version control, ensuring a systematic and organized development process.
- Employed Gradle as the primary build tool, contributing to a standardized and efficient development workflow.

Environment: React-Native,React-JS,TypeScript,JavaScript,FireBase, REST Client,WebDriver, AWS, JIRA, Git.

Project: Aapka Bazaar-Online Grocery
Role: React Js and React-Native Developer

Responsibilities:
- Proficiently designed front-end applications and user-interactive web and mobile apps utilizing industry-standard web technologies such as React JS, HTML, CSS, JavaScript, and TypeScript.
  Also, adept in React-Native for mobile application development.

- Implemented crucial functionalities including searching, filtering, sorting, and validation using React JS and JavaScript, enhancing overall user experience.
- Actively participated in Daily Scrum meetings, providing valuable contributions to project progress. Engaged in regular reviews and demos with management, ensuring alignment with project goals.
- Utilized JIRA for meticulous effort tracking and Git for version control, ensuring a streamlined and collaborative development process.
- Employed Gradle as the build tool, contributing to efficient and effective project development.

Environment: React-Native,React-JS,TypeScript,JavaScript,FireBase, AWS, JIRA, Git.

Project: Maintenance Master
Role: React Js and Node-Js Developer

Responsibilities:

- Designed sophisticated front-end applications with a focus on user interactivity, utilizing web technologies such as React JS, HTML, CSS, and JavaScript.
- Successfully implemented essential functionalities including search, filtering, sorting, and authentication using React JS and Node.js.
- Active participant in daily Scrum meetings, consistently contributing to project review and providing effective demos to management.
- Utilized Asana and ScreenMeter for efficient effort tracking, and Git for version control.

Environment:,React-JS,TypeScript,JavaScript Git, Express,Firebase.

Project: Delhi vakil
Role: React-Native Developer

Responsibilities:

- Managed the entire app development lifecycle, from conceptualization to launch.
- Implemented key features such as consultations with lawyers, legal advice, upload and verification of legal documents, and providing legal news and information about law colleges.
- Worked closely with UI/UX designers to translate design concepts into reliable and efficient code.
- Implemented Redux for managing app data.
- Integrated third-party features and APIs to enhance app functionality and provide additional value to users.

Project: Dubai Charity
Role: React-Native Developer

Responsibilities:

- Developed mobile apps using React Native, working closely with design teams for a user-friendly experience on both iOS and Android.
- Owned the entire app development process, from idea to launch, ensuring smooth performance.
- Collaborated with UI/UX designers to turn designs into reliable code.

- Used Redux for managing app data and ensuring a scalable and efficient user experience.
- Integrated third-party features and APIs to improve app functionality.
- Reviewed code for quality, following coding standards, and fixed bugs with QA teams.
- Stayed updated on industry trends and tech innovations.
- Participated in Agile/Scrum meetings and mentored junior developers.
- Introduced automated testing to make code more reliable.
- Improved development processes with new tools and methods.

Project: SumUpNow – AI-Powered Content Summarization App
Role: AI Developer

Responsibilities:

- Designed an AI-based app to summarize diverse content formats, offering personalized summaries for users.
- Implemented a modular approach involving UI/UX, backend, and advanced AI integration for efficient development.
- Deployed NLP models to process large datasets and generate concise summaries in multiple formats (text, audio, video).
